

EXAMPLE Student Learning Objective (SLO) Template (with Embedded Checklist)

Teacher Name Content Area and Course(s): Middle School Choir Grade Level(s): 7-8 Academic Year: 2013-2014

Please use the guidance provided in addition to this template to develop components of the student learning objective and populate each component in the space below.

Baseline and Trend Data

What information is being used to inform the creation of the SLO and establish the amount of growth that should take place?

A pretest was administered to students during the month of September. This test involved students singing a ten-note phrase of music on solfege syllables. The students were taught how to sing this phrase in a group context, and then individuals were tested on singing this phrase four consecutive times. The first time, the accompanist plays what the student sings, note for note. The second time, the accompanist plays an ostinato in the left hand as the student sings. The third time, the accompanist plays a countermelody in the right hand. The final time, the accompanist plays a melody that is a third above the singer. The students receive a point each time they sing a correct pitch.

If students scored at least a 38 on the first portion of the assessment, students were given an extended assessment. In this portion, students were taught a 5 note phrase of music. Students then sang this phrase with pre-recorded voices a total of three times. On the first time, the student attempted to match the pitches a cappella. The second time, the student attempted to sing the excerpt with a bass line that differs. The third time, the student was required to sing the "middle harmony" in a chord of voices. The students receive 2 points each time they sing a correct pitch.

If students had a perfect score of 70, they will take yet another assessment that measures sight reading capability. Students will sight read a line of music they are unfamiliar with and will earn a point for each note sung correctly, as well as a point for each rhythm sung correctly.

The results of this pre-test are attached to this SLO Document.

The assessment is worth a total of 70 points.

As I reviewed the data, I noticed that many students can match pitches if the piano part is complimentary to the voice part. However, when the piano deviates from the vocal part, many students are unable to remain independent. This is something that will be taught over the course of the year. It is a valuable and necessary skill for students to know so that a choir can sing in harmony and become less reliant on the instructor to teach a vocal line by rote instruction.

valuable and necessary skill for students to know so that a choir can sing in narmony and become less reliant on the instructor to teach a vocal line by
rote instruction.
Checklist & Comments: Baseline and Trend Data
Does the identified baseline and trend data meet the following criteria?
☐ Identifies sources of information about students (e.g., test scores from prior years, results of pre-assessments)
□ Draws upon trend data, if available
☐ Summarizes the teacher's analysis of the baseline data by identifying student strengths and weaknesses

Comments/Questions:
1.
2.
3.
Student Denulation
Student Population Which students will be included in this SLO? Include course, grade level, and number of students.
Each of the 171 choir students at Willowick Middle School was tested. 105 are in 7 th grade, and 66 are in 8 th grade.
The population includes 106 females and 65 males.
20% of these students are either on an IEP or have a Section 504 for accommodations in the classroom.
Over 95 % of these students have not sung in a choir for more than a year. The act of singing a melodic line in tune is difficult for them, but achievable when instruction provides the opportunity to practice this discipline on a daily basis.
provides the opportunity to practice this discipline on a daily basis.
Checklist & Comments: Student Population
Does the identified student population meet the following criteria?
☐ Identifies the class or subgroup of students covered by the SLO
□ Describes the student population and considers any contextual factors that may impact student growth
☐ If subgroups are excluded, explains which students, why they are excluded and if they are covered in another SLO
1.
2.
3.
Interval of Instruction
What is the duration of the course that the SLO will cover? Include beginning and end dates.
What is the duration of the course that the 320 Will cover, include segiming and tha dutes.
August 2013 to April 2014
Each middle school choir class meets every other day for forty-five minutes.
Checklist & Comments: Interval of Instruction
Does the interval of instruction identified meet the following criteria?
☐ Matches the length of the course (e.g., quarter, semester, year)
☐ Considers the length of the course in relation to the instructional pacing when the initial (starting point) and summative (endpoint) growth measure
evidence collection occurs – deadline of April 15 th for year-long courses and 2 nd semester courses / as identified for 1 st semester courses and 9-week
courses (no later than April 15 th)
1.
2.
3.

Standards and Content

What content will the SLO target? To what related standards is the SLO aligned?

This SLO will target the act of singing a line of music independently and maintaining that part when other parts are played on a piano or recording.
ODE 2012 Music Standards
7 th Grade 2PR Perform accurately, independently or collaboratively, with good posture producing an appropriate tone quality. 8 th Grade 2PR Perform accurately, independently or collaboratively, with good posture producing an appropriate tone quality.
National Association for Music Education Standard #1:
Singing, alone and with others, a varied repertoire of music
Checklist & Comments: Standards and Content
Do the standards and content described meet the following criteria?
□ Specifies how the SLO will address applicable standards from the highest ranking of the following: (1) Common Core State Standards, (2) Ohio Academic Content Standards, or (3) national standards put forth by education organizations
□ Represents the big ideas or domains of the content taught during the interval of instruction (between the initial (starting point) to the summative (endpoint) growth measure evidence collection - deadline occurs: April 15 th for year-long courses and 2 nd semester courses / as identified for 1 st semester courses and 9-week courses (no later than April 15 th)
☐ Identifies core knowledge and skills students are expected to attain as required by the applicable standards (if the SLO is targeted)
1.
2.
3.

Assessment(s)

What assessment(s) will be used to measure student growth for this SLO?

Throughout the year, there will be daily informal assessments that I will use to decipher whether or not students are becoming independent in producing a vocal line. Throughout the year, assessments will be given in small groups to see if students are mastering their repertoire. These assessments will shed a great deal of light on the progress that students are making.

In April, a post-assessment will be given that is identical to the pre-assessment that is described earlier in this SLO. Unlike a math or social studies summative assessment, the student cannot benefit from taking the same test a second time. An improvement in skill is the only way that the student will be able to improve their score on this type of test.

Checklist & Comments: Assessment(s)
Does the description above meet the following criteria?
☐ Identifies assessments that have been reviewed by content experts to effectively measure course content and reliably measure student learning as intended
□ Selects measures with sufficient "stretch" so that all students may demonstrate learning, or identifies supplemental assessments to cover all ability levels in the course
□ Provides a plan for combining assessments if multiple summative assessments are used
☐ Follows the guidelines for appropriate assessments
☐ Matches the interval of instruction and reflects consideration of summative (endpoint) growth measure evidence collection deadline occurs — April 15 th for year-long courses and 2 nd semester courses / as identified for 1 st semester courses and 9-week courses (no later than April 15 th)
1.
2.
3.
Growth Target(s)
Considering all available data and content requirements, what growth target(s) can students be expected to reach?
There are 70 possible points on this assessment.
Students that scored between 0 and 15 are expected to make a 10 point improvement.
Students that scored 16 are expected to make a 9 point improvement.
Students that scored 17 are expected to make an 8 point improvement.
Students that scored 18 are expected to make an 7 point improvement.
Students that scored 19 are expected to make a 6 point improvement.
Students that score between 20 and 24 are expected to make a 5 point improvement. Students that score between 25 and 39 are expected to make a 4 point improvement.
Students that score between 40 and 60 are expected to make a 4 point improvement.
Students that score between 61 and 69 are expected to make to improve to a score of 70.
Students that score 70 will take the High School Post-test and will be expected to score at least 8 points on it.
Checklist & Comments: Growth Target(s)
Does the identified growth target(s) meet the following criteria?
☐ All students in the class have a growth target in at least one SLO
☐ Uses baseline or pretest data to determine appropriate growth
☐ Sets developmentally appropriate targets
☐ Creates tiered targets when appropriate so that all students may demonstrate growth
☐ Sets ambitious yet attainable targets
□ Reflects consideration of interval of time between initial (starting point) growth measure evidence collection and summative (endpoint) growth measure evidence collection deadline occurs – April 15 th for year-long courses and 2 nd semester courses / as identified for 1 st semester courses and 9-week courses (no later than April 15 th)

What is your rationale for setting the above target(s) for student growth within the interval of instruction	What is	vour rationale	for setting the above	taraet(s) for student aro	wth within the interval of instruction
--	---------	----------------	-----------------------	---------------------------	--

what is your rationale for setting the above target(s) for student growth within the interval of instruction:
For students who score between 0 and 15, It is reasonable for students to be expected to improve by 10 points. This means that students will learn the
skill of matching pitches. Data drives instruction, therefore, students will be consistently working on matching pitches so that they can develop more
difficult skills in the future.
As students score higher and higher on the assessment, it becomes harder to show that much growth, so the growth target becomes smaller. However,
once students begin to score above 40, it actually becomes more attainable to improve by ten points. This logic is dictated by the nature of the aural
skills needed for this assessment.
These targets align with other district goals because they must be achieved for the choral program to thrive at a district level. Without matching pitches
and singing independently, the singers will struggle to make music that is rewarding and challenging.
