"The Testing Charade: Pretending To Make Schools Better" by Daniel Koretz

"In his new book, Daniel Koretz, an eminent testing expert at Harvard University, has skillfully dissected the multiple negative consequences of the education reforms of the 2000s." ~Diane Ravitch

"What is significant about this book is the thorough and relentless critique by a testing expert who carefully and sometimes technically dissects the evidence." ~Jan Resseger

"A vivid and disturbing account of pervasive design problems in test-driven accountability systems, pernicious effects of high-stakes testing, and the extremes to which accountability testing has taken us. . . In addition to being highly readable, engaging, and accessible to a broad, nontechnical audience, The Testing Charade is lucid, measured in tone, well argued, and amply documented. "

We are parents, teachers and members of the community who are dedicated to a system of public schools that provides all children an education that gives them the opportunity to succeed in life. We believe in our schools, our teachers, our families and our students.

State mandated tests are not legitimate measures of the quality of education students experience or our community values. We advocate for the end of state and federal policies that are harming children and public education.
